Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA survey occurred in March 2005 and no uses were observed. There was evidence of fishing, but the stream barely met the depth criterion in only 1 out of 6 sites and the average depth criterion was barely met in 1 of the 6 (same site and only upstream). Banks were steep. Because of the overall shallow depth of the stream, the committee recommends that the WBCR designation be removed. However, it is recommended that SCR be considered.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☒ Remove Use
